The Problem Every Restaurant Owner Faces

1

No Visual Menu

Customers read dish names but cannot picture what they are ordering. Half the dishes go completely unnoticed.

2

No Digital Presence

No way to showcase your best dishes, build customer loyalty, or stand out from the competition around you.

3

Zero Customer Data

You have no idea which dishes customers love, which they avoid, or which ones get the most saves and re-orders.

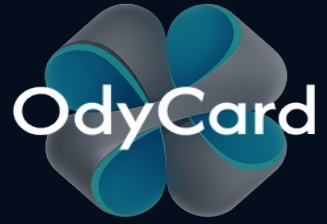

4

Slow Menu Changes

Change a price or hide a sold-out dish? Your physical menu is outdated and there is no live fix available.

OdyCard solves ALL of this — with one QR code.

Introducing

OdyCard

Smart QR Menu Platform

One QR code on your table turns your menu into an immersive, AI-powered digital experience that your customers will remember.

1

Smart Visual Menu

Beautiful dish photos with live ratings, favorites and eat-later lists.

2

Augmented Reality

Customers point their phone at the table and see the dish appear in real life.

3

AI Intelligence

AI Waiter answers customer questions.
AI Manager gives business insights.

How It Works

Three simple steps. Zero complexity.

STEP 1

Owner Signs Up and Builds Menu

Add dishes with photos, set timings, hide or show items instantly from your phone. No tech skill needed.

STEP 2

Customers Scan the QR Code

One scan on any smartphone. No app download needed. Customers see your full interactive menu instantly.

STEP 3

Explore, Rate and You Grow

Customers browse, rate dishes, save favorites, and view dishes in AR. You see real-time data on everything.

Live sync: when you update a dish, every customer sees it within 2 seconds.

The Customer Experience

Your customers get a beautiful, interactive menu. Instantly. No app download required.

Visual Dish Cards

Crystal-clear photos of every dish

Live Star Ratings

Real customer ratings on each dish

Favorites

Customers save their favourite dishes

Eat Later List

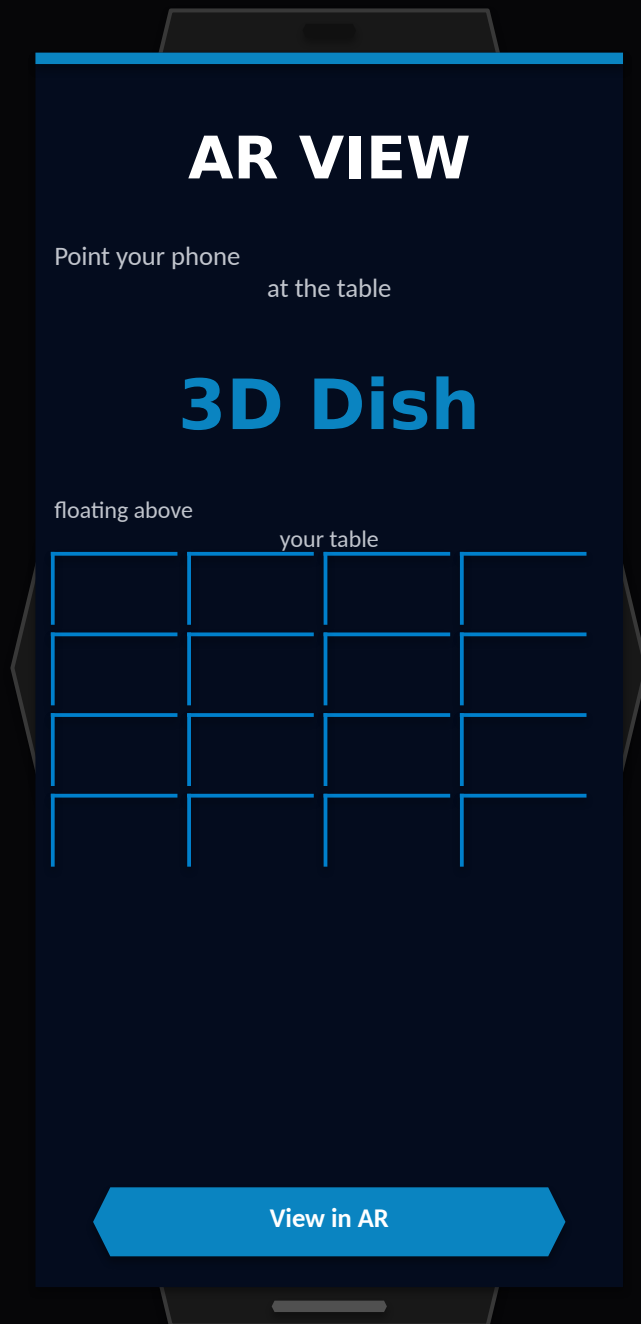

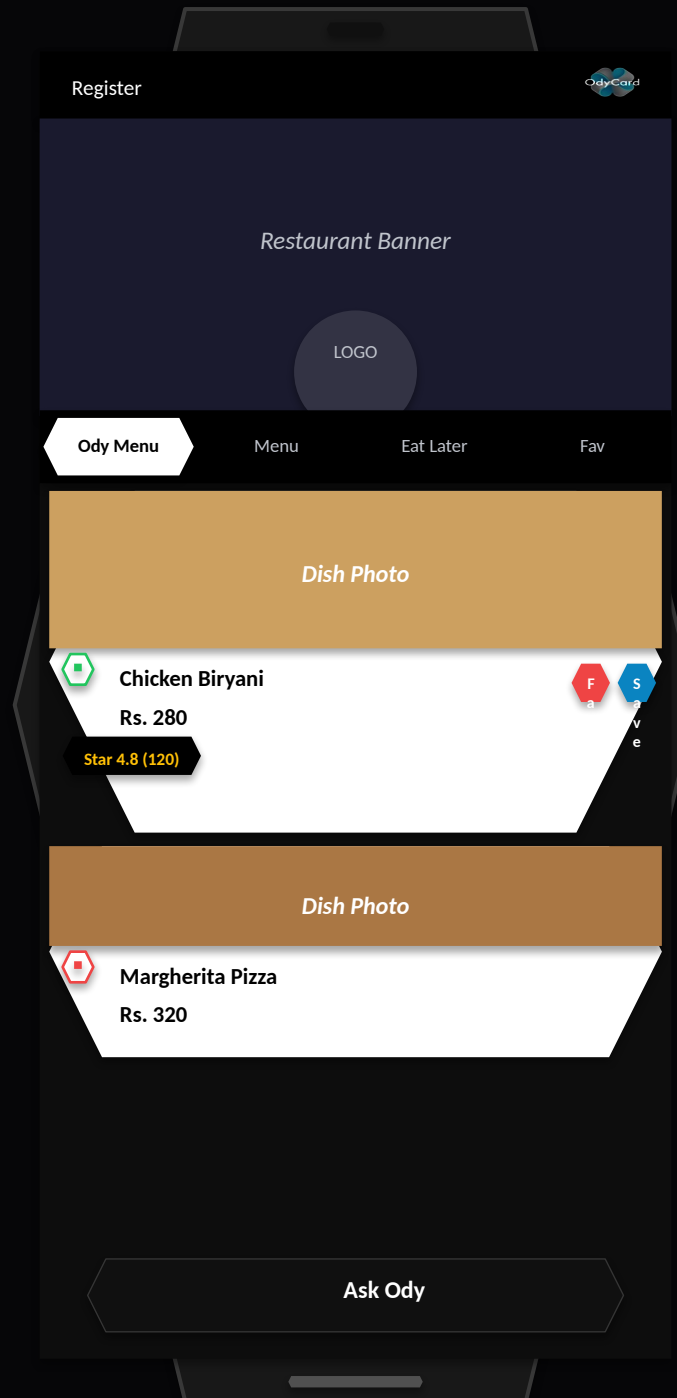

Save dishes to revisit next time

Smart Search

Search any dish by name, live

Ask Ody (AI)

AI assistant answers food questions

See Your Food Come Alive

Augmented Reality | Powered by Luma AI | Works on any phone browser

Luma AI Model

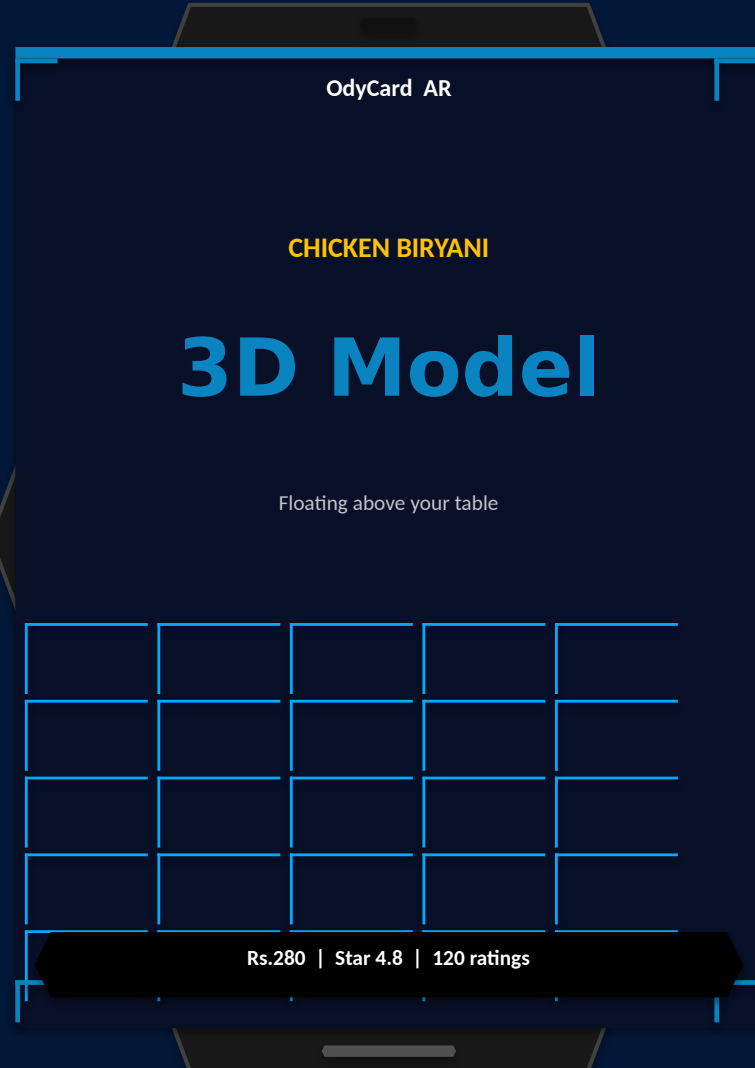

Owner records a short video.
Luma converts it to a 3D
model automatically.

No App Needed

Works directly in the mobile
browser. WebXR on Android,
AR QuickLook on iOS.

One-Time Setup

Owner captures the dish once.
Customers view it forever.
Zero recurring cost.

Best for Solid Dishes

Burgers, biryanis, desserts,
pizza — look stunning in 3D.
Real color and texture.

Real Scale

Dish appears at actual size
on the customer's real table.
Totally immersive.

Currently Free

Luma AI API is in beta.
Capture is free right now.
No cost per dish.

Features That Keep Customers Coming Back

1

Favorites

Customers mark favourite dishes. Your best sellers highlighted automatically. Builds loyalty and repeat visits.

2

Eat Later List

Save a dish for the next visit. Builds habit and repeat customer behaviour across every restaurant visit.

3

Dish Ratings

1-5 star ratings with reason tags. You see exactly why customers love or dislike each dish on your menu.

4

Smart Search

Customers search any dish by name across your full menu in real time. Works perfectly even on big menus.

5

Live Menu Updates

Hide a dish, update a price, change timing — customers see it within just 2 seconds. Completely live.

6

Ask Ody AI

AI assistant answers customer questions about dishes, ingredients, allergens and personalised recommendations.

Artificial Intelligence, Built In

AI Waiter

A smart assistant that talks to your customers

- Answers 'What dishes are vegetarian today?'
- Recommends dishes based on past ratings
- Explains ingredients and allergens clearly
- Available 24/7 with no additional staff cost
- Responds naturally in the customer's language

AI Manager

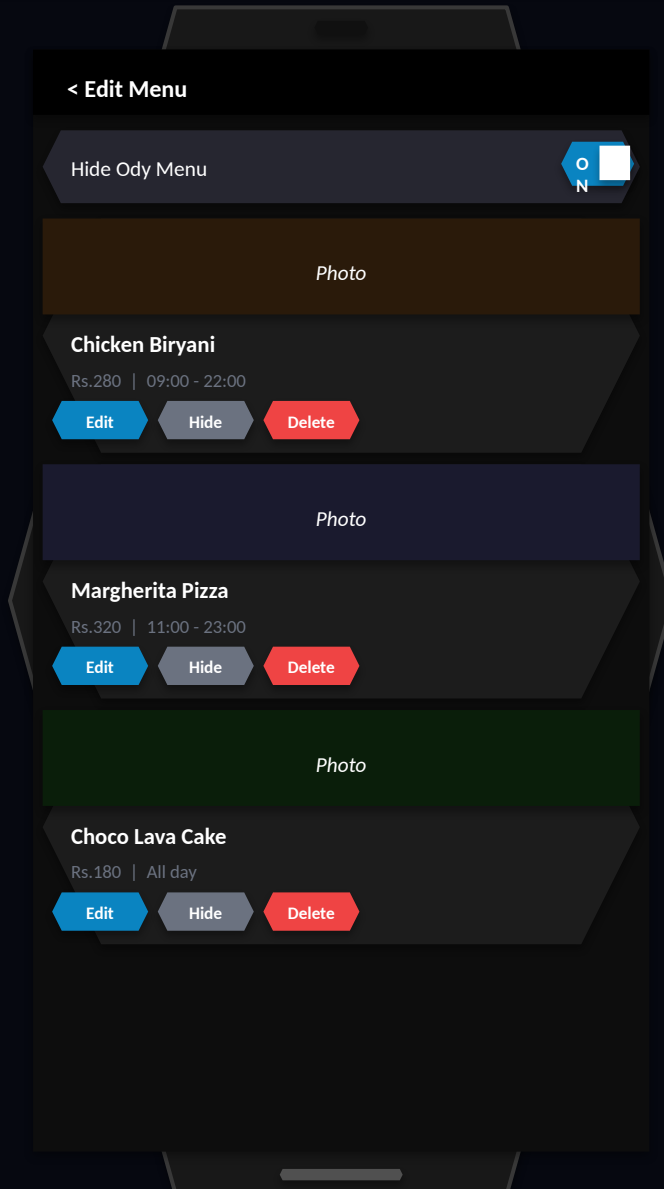

Business intelligence from your restaurant data

- Identifies your top 5 best and worst dishes
- Spots trends: 'Dessert orders peak at 8pm'
- Alert: 'Butter Chicken rating dropped to 2.9'
- Weekly auto-generated performance reports
- Based on bills, ratings, favorites and eat-later data

Both powered by Gemini Flash — fast, accurate, and affordable.

Owner Menu Management

Full control from your phone — no tech skills needed.

Add Dishes Instantly

Upload photo, set name, price, quantity and timing. Ready in under 2 minutes.

Timing-Based Visibility

Set 4pm-9pm for a dish. It auto-hides outside those hours for all customers.

Live 2-Second Sync

Toggle Hide on any dish and every customer sees it gone within 2 seconds.

Hide Entire Ody Menu

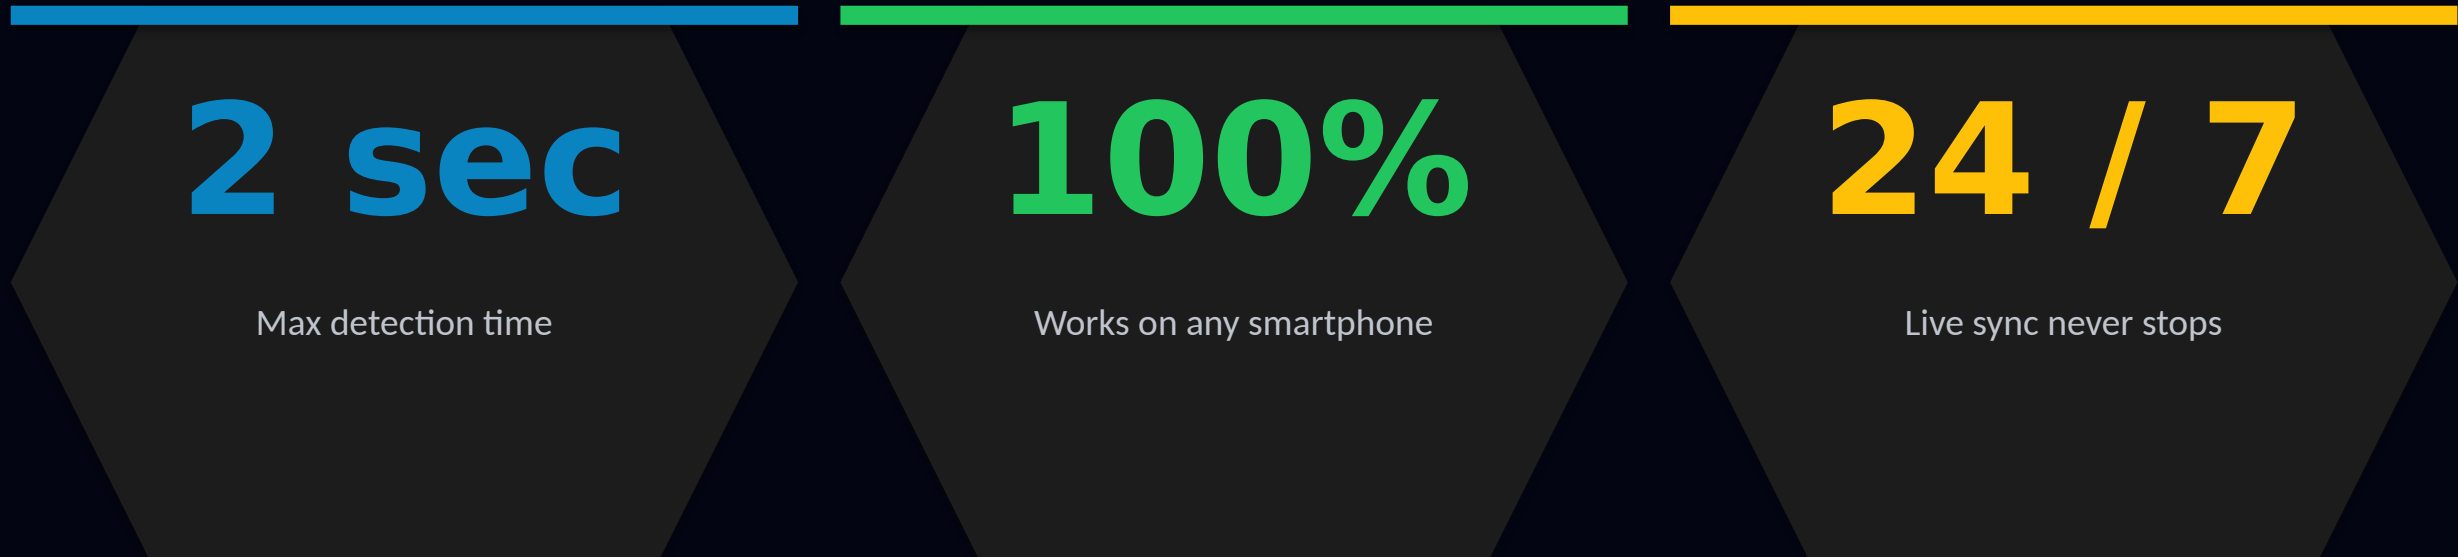

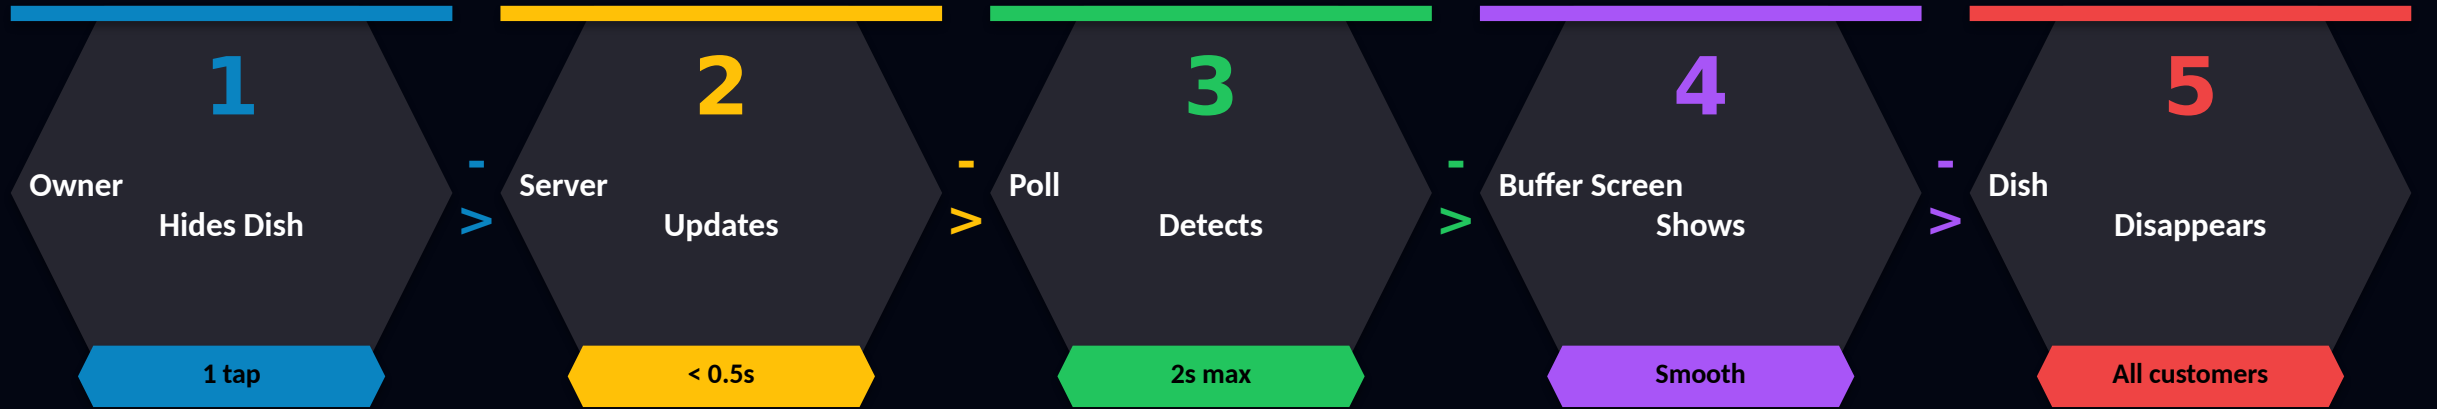

One toggle hides the full Ody Menu tab for all customers. Instantly live.

Delete Dishes

Remove dishes permanently with one tap. Gone from the menu immediately.

Real-Time. Always.

Every change you make goes live to every customer within 2 seconds.

Simple, Honest Pricing

Rs. 399

per month | per restaurant

No Setup Fee

No hidden charges.
No long-term contract.
Cancel any time.
