

OdyCard

The Smart QR Menu That Makes Customers Fall In Love With Your Food

OdyCard turns any restaurant table into an immersive, AI-powered digital menu experience with one QR code — no app download, no hardware, no technical skill required.

Rs. 399

Per Month Only

The Problem

Every restaurant owner in India faces the same four walls every day:

No Visual Menu

Customers read dish names but cannot picture what they are ordering. Half the dishes go unnoticed.

No Digital Presence

No way to showcase your best dishes, build customer loyalty, or stand out from the competition next door.

Zero Customer Data

You have no idea which dishes customers love, which they avoid, or which ones get the most saves and re-orders.

Slow Menu Changes

Change a price or hide a sold-out item? Your physical menu is outdated with no live fix available.

OdyCard solves all four — with one QR code.

The Solution

OdyCard is a Smart QR Menu Platform built for Indian restaurants. One QR code on your table opens a fully interactive, mobile-first digital menu that runs in any browser — no app download needed.

Smart Visual Menu

Beautiful dish photos with live ratings, customer favorites and eat-later lists. Every dish gets a second chance to be seen.

Augmented Reality View

Customers point their phone at the table and see any dish appear in real life via AR — powered by Luma AI.

AI Waiter

Customers can ask the AI anything about the menu — ingredients, spice level, recommendations — and get instant answers.

AI Manager

Owners get weekly AI-generated business insights: top dishes, customer trends, what to promote and what to rethink.

Live 2-Second Sync

Toggle a dish off, update a price, or hide the full menu — every customer sees the change within 2 seconds, no page refresh.

How It Works

Three simple steps. Zero complexity. No technical skill required.

1

Owner Signs Up & Builds Menu

Add dishes with photos, set timings, hide or show items instantly from your phone. Ready in under 2 minutes per dish.

2

Customers Scan the QR Code

One scan on any smartphone opens the full interactive menu. No app download. Works on every device.

3

Explore, Rate & You Grow

Customers browse, rate dishes, save favorites, view dishes in AR, and ask the AI Waiter questions. You see real-time data on everything.

Live sync: when you update a dish, every customer sees it within 2 seconds — without refreshing their page.

Owner Dashboard

Every restaurant gets a powerful, mobile-first owner dashboard accessible from any smartphone. No desktop, no complexity.

Add Dishes in Under 2 Minutes

Upload a photo, set name, price, quantity and timing. The dish goes live instantly.

Timing-Based Visibility

Set a dish to appear only between 4 PM – 9 PM. It auto-hides outside those hours for all customers — no manual effort.

Live Hide / Show

Toggle any dish off and it disappears from every customer's screen within 2 seconds. Toggle the full Ody Menu tab with one switch.

Menu Categories

Organise dishes into custom categories. Customers navigate with a smooth horizontal tab bar — starters, mains, desserts and more.

Ratings & Social Stats

See how many customers rated, favorited or saved each dish to their eat-later list. Know what's really popular.

Pricing

Simple, transparent pricing. Less than a cup of chai per day for a complete digital menu.

What's Included	Price
✓ Full Ody Menu — unlimited dishes

India

Primary Market

Near-term roadmap:

- Online ordering & table-side payments integrated into the QR menu
- WhatsApp and Instagram direct menu sharing
- Multi-branch support for restaurant chains
- Regional language support (Tamil, Hindi, Telugu)
- Loyalty programmes and customer re-engagement campaigns

Why now?

India has over 7.5 million restaurants. Less than 3% have any form of digital menu. Post-COVID, QR menus are now an expectation — not a novelty. OdyCard is the first platform to combine live updates, AR, AI and owner analytics in a single Rs. 399/month product.

Get Started

Ready to transform your restaurant's customer experience?

Visit **odysra.com** to sign up and go live in minutes.

No setup fee

Start immediately with zero upfront cost.

No long-term contract

Pay month to month. Cancel anytime.

No tech skill needed

If you can use WhatsApp, you can use OdyCard.

Works on any smartphone

No app download for owners or customers.
